DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to antisense compositions, classifiable in class 536, subclass 24.5.
 - II. Claims 8-13 and 14-24, drawn to pharmaceutical compositions and methods of treatment using antisense compositions, classifiable in class 514, subclass 44.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the antisense compositions could be used as probes in *in vitro* methods such as Southern blots.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their divergent classification and recognized divergent subject matter, and the search required for each of Group I or II is not required for the other Groups, restriction for examination purposes as indicated is proper.
